All Gripple® acoustic solutions are manufactured in the United Kingdom, and have been designed to save you time, money and labour by improving the efficiency of the installation process. Unlike traditional methods, Gripple kits require no on-site cutting, filing or use of uPVC frames, so offer enormous time-saving benefits for your project.

Our products that fit directly into acoustic baffles and panels, uPVC frames and suspended ceilings offer a sleek, professional and discreet finish, without compromising on strength; supplied in ready-to-use kits with your choice of end fixing and wire rope length.

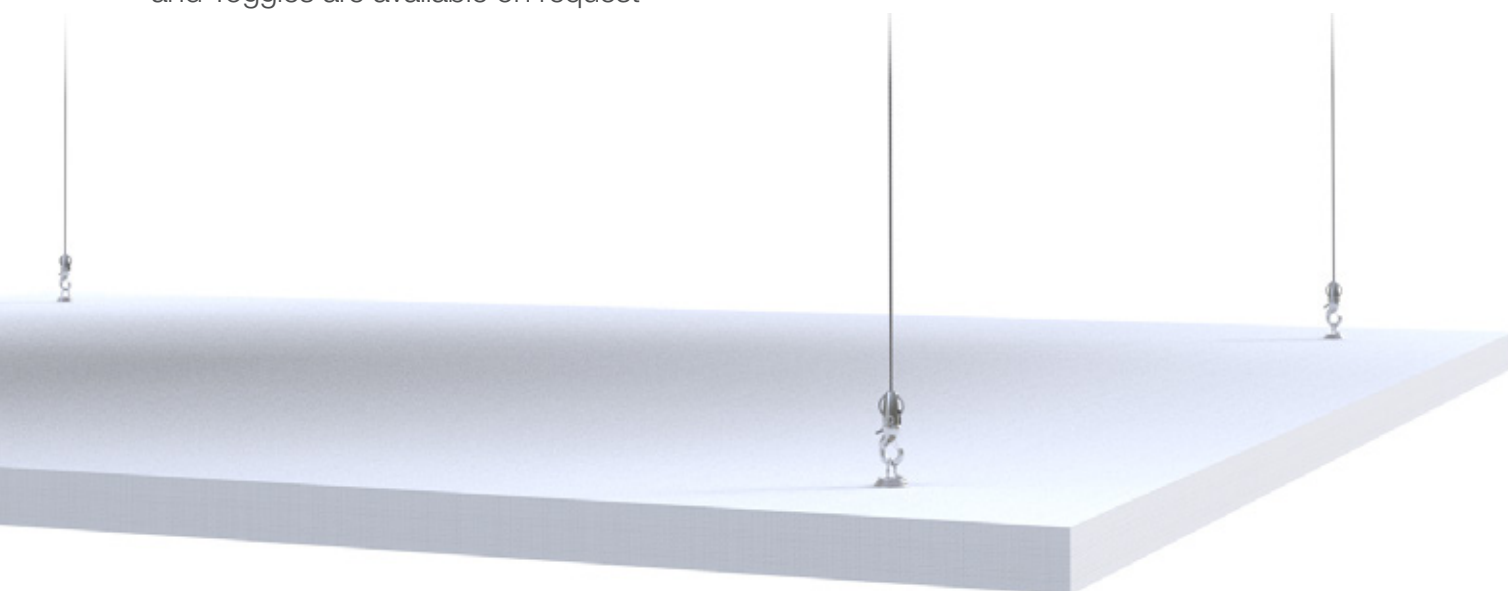

Gripple kits provide complete solutions
for all acoustic suspension applications

Angel (AL)

Our latest innovation, designed for suspensions where aesthetics can not be compromised.

- Available with a variety of foot fixings including mini hook for use with spring anchors or a male thread in a variety of diameters and lengths for fixing directly into uPVC frames
- Simple one-handed operation for easy adjustment
- Contemporary design to complement the overall suspension
- Suitable for loads up to 15 kg with a 5:1 safety factor, to accommodate a range of suspension requirements
- Supplied in convenient, ready-to-use kits in lengths up to 10 m as standard
- As standard, all kits come complete with the aesthetic 'Top Hat' ceiling fixing with M6 thread. Other ceiling fixings, e.g. Loops, Studs, and Toggles are available on request

Catenary and C-Clip

Create secure, overhead spans by running high strength wire rope between two fixing points. Ideal for applications where no direct vertical anchor point is available. The Gripple C-Clip, an innovative twist-on/off device, allows you to suspend from anywhere along the span.

- Visually discreet and lightweight
- Additional C-Clips can be added/fitted retrospectively
- No tools required for install
- Available in 3 mm and 6 mm wire rope diameters, for suspensions up to 100 kg per span
- C-Clip allows for horizontal and vertical adjustment
- C-Clip cams lock solidly in place, even at angles up to 60°

Quick, simple installation with horizontal and vertical adjustment

Acoustic Spring Anchor

Create custom anchor points for simple connection to a Gripple hanger. Suitable for use across a range of acoustic panels.

- Ideal for use with the Angel Hook, or Express
- Available in standard (2 mm) and large (4 mm) sizes for panels up to 40 mm in depth
- No tools required for installation
- Available as part of a ready-to-use kit with a length of wire rope, your choice of end fixing and a Gripple hanger, or in bulk as an accessory

Please note, depending on the specific application, maximum load ratings will vary. Check with the panel manufacturer for advice.

A fast and cost effective installation solution

- Use for adjusting the Gripple hanger height (pre-load)
- Two sizes available - for Gripple hangers No.1-No.3 and Standard hangers No.4 and 5.

Product codes:
KEY-FLAG (No.1 - No.3)
KEY-HF45-LK (No.4 & No.5)

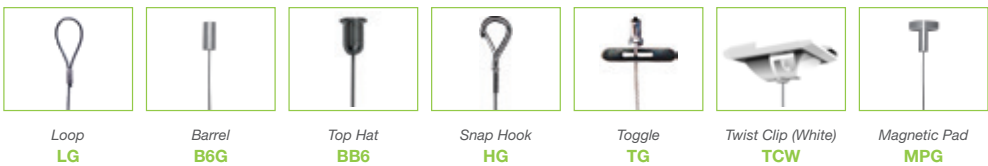

Product codes

How to work out your unique product code

1) Choose your kit type:
(Input the code in the red area below)

2) Choose your end fixing:
(Input the code in the green area below)

3) Choose your wire length:
(Input the code in the blue area below)
Bespoke lengths are available upon request.

4) Enter your unique product code:

For 3 mm Catenary kits use **CTI-3MM-XXM**, where “XX” is the required length. For 6 mm Catenary kits use **CTI-6MM-XXM**, where “XX” is the required length.
Both our 3 mm C-Clip and 6 mm C-Clip can be ordered as an end fixing, using CC3 and CC6 alongside a choice of kit respectively.
The Angel has a variety of connector types not listed above, please call **0800 0184 264** or visit our website www.gripple.com for further details.

Black Line

Gripple’s ready-to-use suspension kits now come with the option of a black finish to further enhance the aesthetic appeal of the range.

The slim and unobtrusive aesthetics of Gripple’s wire suspension system have always proved perfectly suited to the design of many modern buildings where building services in the roof space are left exposed and visible.
